

Md. Shakil Khan

Front-End Web Developer

Address: Cumilla, Bangladesh | Email: dev.shakilkhan@gmail.com | Phone: (+880) 188239866

GitHub: <https://github.com/shakilkhan2> | LinkedIn: <https://www.linkedin.com/in/khanshakil99>

Career Objective:

Motivated and dedicated front-end web developer with a passion for creating visually appealing and user-friendly websites. Seeking an opportunity to contribute to innovative projects while continuously expanding my skills in HTML, CSS, JavaScript and React.

Skills:

Expertise: React | Java Script | ES6 | HTML5 | CSS | Tailwind | CSS
Comfortable: Firebase | Express JS | React Router
Familiar: JSON | MongoDB | AOS
Tools: Chrome Dev Tool | GitHub | VS Code | Create React App | Netlify | Vercel | Npm

Projects:

The Art Academy | [Website](#), [GitHub](#)

The Art Academy website has separate dashboards for administrators, instructors, and students.

- Administrators have the authority to assign the role of an admin to instructors, as well as approve or deny classes and provide feedback to instructors.
- Instructors can add and update classes, monitor the status of their classes, and view the feedback provided by the admin.
- Students have access to their own dashboard, where they can see their enrolled classes, select new classes, and view their payment history.

Tools and Technologies: React JS | Express JS | MongoDB | Firebase Authentication | React Router | Tailwind CSS

Speedy Toy | [Website](#), [GitHub](#)

A toy seller site that brings smile to the kids and speed up their creativity.

- Speedy Toy is a toy selling website where user can find different types of exciting toy that represents the speed. There are three categories with Truck, Train and Sports Car.
- This attractive website will attract user with minimalist slider and beautiful gallery section with happy kids.
- A user can see details information of specific toy and by login user can add, remove and update the toy information.

Tools and Technologies: React JS | Express JS | MongoDB | Firebase Authentication | React Router | Tailwind CSS | AOS
